

MRITUNJAY KUMAR

AI/DS Engineer

Bengaluru, India | + 91 8002800219 | [Email](#) | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI/DS Engineer with 4+ years across data science and analytics, now building and deploying production-grade intelligent systems. M.Tech in AI & Data Science from IIT Patna, with hands-on depth in RAG pipelines, LLM fine-tuning (LoRA/PEFT) and data-driven solutions that optimise real-world operations.

EDUCATION

M.Tech — Artificial Intelligence & Data Science Indian Institute of Technology, Patna	2024-2026 8.01 CGPA
--	------------------------

TECHNICAL SKILLS

Programming: Python, JavaScript
Gen AI & LLM: LangChain, MCP, RAG Pipelines, Fine-Tuning (*LoRA, PEFT*)
ML & MLOps: PyTorch, TensorFlow, Scikit-learn, MLflow, W&B
Data Pre-Processing & Statistics: NumPy, Pandas, Matplotlib, Hypothesis Testing
Frontend: HTML/CSS, Tailwind CSS, Three.js, React.js, Streamlit
Backend: FastAPI, Flask, Express, Node.js
Databases & Vector Stores: PostgreSQL, MongoDB, ChromaDB, AWS Redshift
Cloud & Collaboration: AWS (S3), Docker, Git, JIRA, Agile/Scrum

PROFESSIONAL EXPERIENCE

AI/ML Engineer, Fotobubbles	May 2026-Present
- Building Veylix, an AI image-tagging platform: architected the CLIP embedding and retrieval pipeline over S3-backed storage and an RLHF-style human-in-the-loop feedback loop that captures reviewer corrections. - Fine-tuned CLIP with LoRA on domain-specific imagery, lifting tag accuracy from 52% to 86% against the base model.	
AI Engineer (Freelance), Webrizen	Aug 2025-Apr 2026
- Architected, deployed and monitored an AI-enabled resort ERP end-to-end (live at patnawaterpark.com) — React/Tailwind on Vercel, Node/Express and FastAPI on Render, MongoDB — covering bookings, billing/POS, QR ordering, cafeteria and staff management. - Fine-tuned CLIP with LoRA for Aadhaar-based guest ID verification, cutting check-in time by 90%.	
Senior Officer (Analytics), IDFC First Bank	Sept 2023-Mar 2024
- Modeled service demand using time-series analysis of seasonality and campaign impacts, reducing overstaffing costs by 15% while maintaining service levels. - Forecasted support demand for card launches and campaigns with 90%+ accuracy to optimize staffing readiness.	
Data Analyst, Allen Classes	Oct 2020-Nov 2022
- Designed & delivered multiple dashboards consolidating onboarding, attendance, loyalty points, Discounts and tier movement, enabling leadership decision-making across Bihar. - Onboarded & monitored 20+ sales incentive plans across 3+ business units, providing transparent KPI visibility.	

PROJECT

RAG-Based Q&A Chatbot	Jan 2025-Jun 2025
Tech Stack: Python, LangChain, Transformers, ChromaDB, OpenAI API, PostgreSQL	M. Tech Thesis
Built a RAG chatbot letting students query institute documents in natural language, with a query-classification stage ahead of the pipeline that routes each question to its relevant document set — cutting tokens per chat by 40%.
